

To whom it may concern,

Recently XFM Radio has contacted me with news of the Association of Broadcasters (NAB), the group that represents the large radio and television owners, is using its lobbyists, campaign contributions and political influence to stop XM from offering traffic and weather information and other services that people who pay for their service. As a soldier defending the constitution which military and the people believe as a whole, to be the backbone of our society today. This leaves a bad taste in the mouths of everyone i know here at bragg and across the whole military serving the United States proudly both here and abroad.

We fight for the right to recieve certin services (such as talk shows on T.V. and radio) as long as it does not infringe on other peoples rights under the Constitution of the United States. What the NAB is doing is wrong and most of all it is limiting the XM of their first amendment rights. If this should fall through and the XM has to limit what they put out to the public, then i see this act nothing less then how Saddam only aired to the public what he deemed important to keep control of population and their rights.

In short I am and american soldier fighting for this country with pride, and I proudly support what xm gives to the public. Please help the most imformative and entertaining radio station on the planet keep going into the future with thier pride.

Thank You
